DDOS PROTECTION

In recent years the DDoS attacks have become a common thread to any online business. The DDoS attacks aim to block the access to your website by overloading the network and the servers. Any industry can become a target. DDoS attacks are often used as “smokescreen” to divert your attention from other cyber attacks (customer data theft, unauthorised information systems access).

DDoS attacks cause loss of trust, customers and money.

Evolink provides:

- * Reliable DDoS attacks mitigation
- * Competitive monthly fees
- * The price does not depend on the number nor the size of the attacks
- * 30 days free test

Why DDoS protection from Evolink:

- * Immediate detection and defence
- * Detailed reporting
- * No additional latency

Request free test: sales@evolink.com / evolink.com
